GIATI INTRODUCES THE FUTURE GENERATION OF PREMIER PAVILIONS

GIATI Designs, Inc., manufacturer and marketer of quality crafted interior/exterior teak furniture, die-cast aluminum furniture, market umbrellas, pavilions and European all-weather textiles introduces their new **Premier Pavilion**, a luxurious outdoor living space that combines high performance technology with time honored handcrafting techniques. Re-designed and engineered to meet today's challenges, the new **Giati Premier Pavilion** surpasses previous models in beauty and durability. Custom cast fittings, additional tubular ribs, meticulous attention to every construction detail and ease of assembly are the ingredients that establish **Giati Premier Pavilions** as the gold standard in exterior furnishing solutions.

Giati Premier Pavilions are designed to withstand exposure to water and wind. The canopy and drapes are comprised of exterior fabrics that are either water repellent, or permit water to pass through so that fabrics dry rapidly. The pavilion canopy is designed with a wind vent to allow gusts of wind to escape. These wind vents separate from the main canopy so that the wind blows out freely. Pavilions must be securely installed on one of two base options; concrete (set of four) or flange (concrete or wood deck installation).

Pavilion structure consists of powder coated aluminum frames. Four mid-span support ribs have been added to enhance structural integrity and prevent the fabric from sagging. Heavy wall 2" aluminum tubing allows the pavilion to span 12' or more. Tensioned, side-by-side stainless steel wire cables can accommodate both sheer and standard weight curtains.

Pavilion dimensions are 9' by 9' with an overall height of 115"; 10' by 10' with an overall height of 132" or 12' by 12' with an overall height of 132". Valances may be straight, scalloped or crenelated with contrast edging.

The double wind vented canopy gives the pavilion its handsome, regal appearance. A wide array of stunning fabric selections is available for the wind vents, the valance, the draperies and the appliqués from the **Giati Elements™ Collection** of exclusive textiles, sheers and trim.
