Architectural Paneling Offers Details That Matter

Architectural Paneling, Inc., is the design industry's leading source for traditional French and English hand carved paneling, mantels and moldings. In addition, they also offer a full line of highly detailed, hand carved accents that add charm and style to any architectural installation.

Traditional **Corinthian** style capitals adorning either side of a mantelpiece, or larger versions that reach the ceiling, are sure to add a dramatic effect imbuing royalty and sophistication.

The **Egg and Dart** style seen in the trim stems from medieval time, illustrating a repetitive decorative motif often used in classical antiquity and copied in the Middle Ages, and consists of oval motifs alternating with dart-like motifs.

The **Shield and Crest** design accentuates the intricate details of leaves covered by a cherry wood shield carving. The carving is so meticulously crafted and finished, it's a demanding attention piece when added to any mantle, doorway or wall.

All Architectural Paneling pieces can be created custom to fit any size requirement and can be crafted in a variety of wood species that include oak, walnut, cherry, mahogany, maple or poplar.

Architectural Paneling, Inc. has earned a reputation for its commitment to meticulous attention to detail, outstanding quality and custom creations; and has manufacturing facilities in Long Island City, NY and a showroom located in the D&D Building, 979 Third Ave, New York City.
