WINDOW MODES INTRODUCES A LUXURIOUS NEW WINDOW TREATMENT

WINDOW MODES, LTD., the design industry's premier source for innovative window treatments, introduces **Plexi-move**, a system of panels with clean, sleek lines and a neat, contemporary look. The plexi-panels diffuse the intensity of both sun and artificial light to create a warm ambience in any room. You can bring in the light without the glare, while at the same time maintaining privacy. The latest idea in window coverings, **Plexi-move** panels can also be used effectively as room dividers.

Manufactured in Belgium, by **Inside, Plexi-move** is comprised of plexi-glass panels with an aluminum head rail system. They are available in fifty colors and four finishes: matt, gloss, transparent and fluorescent. All sizes are custom. This wide variety of options makes the design possibilities limitless for home, office, restaurant or spa.

WINDOW MODES, LTD., is located in the D&D Building in NYC and represented in major showrooms in design centers nationwide.
